## JABRA OFFICE

### EXPERIENCE THE WIRELESS WORK DAY

The hectic tempo of modern office life places extreme demands on you. You're working faster, trying to accomplish more and communicate both clearly and accurately, while solving problems at your desk, down the hall or on the road.

While most technology has evolved to meet your changing needs, your phone has not. It still ties you to your desk with a cord that's holding you back. Or it rings while you are driving. What you need is a communications solution that helps you keep pace.

Jabra has developed a full range of wireless Multiuse headsets to help you meet these demands with ease. Designed to change the way you communicate, the wireless multiuse headset unclutters your life. Free yourself from the restrictions and confusion of multiple headsets and improve your working efficiency.

Jabra would like you to step into a different working environment, a unified, simplified, wireless one. Embrace the mobility that Jabra can offer; move hands-free and unhindered throughout the day.
