

PLANTRONICS

VPAT 4 Product: Wireless Headsets (Non-HAC)

Operated with dedicated Base assembly

Over the Ear Voice Tube: CS70, CS70/HL10 Lifter

Over the Ear Noise-Canceling: 510S, 510S/HL10 Lifter

Summary Table Voluntary Product Accessibility Template		
<i>Criteria</i>	Supporting Features	Remarks and explanations
Section 1194.21 Software Applications and Operating Systems	Not Applicable- not a software or operating system product.	
Section 1194.22 Web-based internet information and applications	Not Applicable- not a web-based application.	
Section 1194.23 Telecommunications Products	Supports with Exception	VPAT 4 Wireless Headsets do not support Hearing Aid Compatibility (HAC) requirements. See VPAT 3 for HAC supported Wireless Headsets.
Section 1194.24 Video and Multi-media Products	Not Applicable- not a video or multimedia product.	
Section 1194.25 Self-Contained, Closed Products	Not Applicable- not a self-contained, closed product.	
Section 1194.26 Desktop and Portable Computers	Not Applicable- not a desktop or portable computer.	
Section 1194.31 Functional Performance Criteria	Supports	

VPAT 4 Product: Wireless Headsets (Non-HAC)
Operated with dedicated Base assembly
Over the Ear Voice Tube: CS70, CS70/HL10 Lifter
Over the Ear Noise-Canceling: 510S, 510S/HL10 Lifter

Section 1194.23 Telecommunications Products - Detail Voluntary Product Accessibility Template		
Criteria	Supporting Features	Remarks and explanations
(a) Telecommunications products or systems which provide a function allowing voice communication and which do not themselves provide a TTY functionality shall provide a standard non-acoustic connection point for TTY's. Microphones shall be capable of being turned on and off to allow the user to intermix speech with TTY use.	Supports	Headsets support voice communication. Headsets must be plugged into a TTY designed for Voice Carry Over (VCO) and Hearing Carry Over (HCO). Dedicated base controls allow users to intermix speech with TTY features.
(b) Telecommunications products which include voice communication functionality shall support all commonly used cross-manufacturer non-proprietary standard TTY signal protocols.	Supports	Headsets with dedicated bases will not interfere with VCO and HCO TTY's using cross-manufacturer nonproprietary standard TTY signal protocols.
(c) Voice mail, auto-attendant, and interactive voice response telecommunications systems shall be usable by TTY users with their TTY's.	Supports	Headsets will not interfere with VCO and HCO TTY's providing voice mail, auto-attendant, and interactive voice response functions.
(d) Voice mail, messaging, auto-attendant, and interactive voice response telecommunications systems that require a response from a user within a time interval, shall give an alert when the time interval is about to run out, and shall provide sufficient time for the user to indicate more time is required.	Not Applicable: This requirement applies to voice mail, messaging, auto attendant and IVR systems. It does not apply to headsets.	
(e) Where provided, caller identification and similar telecommunications functions shall also be available for users of TTY's, and for users who cannot see displays.	Not Applicable: This requirement applies to caller identification and similar functions. It does not apply to headsets.	

<p>(f) For transmitted voice signals, telecommunications products shall provide a gain adjustable up to a minimum of 20 dB. For incremental volume control, at least one intermediate step of 12 dB of gain shall be provided.</p>	<p>Supports through Equivalent Facilitation</p>	<p>Fine and coarse volume controls in each dedicated base and headset allows the product to meet this clause.</p>
<p>(g) If the telecommunications product allows a user to adjust the receive volume, a function shall be provided to automatically reset the volume to the default level after every use.</p>	<p>Supports through Equivalent Facilitation</p>	<p>The origin of this rule was to protect multiple users of public payphones who have different needs for increased volume. Headsets tend to be worn by a single user. The Plantronics Wireless headsets allow users to adjust volume. Although volume controls for the Wireless Headset system do not reset automatically, circuitry in each headset will protect users from loud sounds regardless of volume setting.</p>
<p>(h) Where a telecommunications product delivers output by an audio transducer which is normally held up to the ear, a means for effective magnetic wireless coupling to hearing technologies shall be provided.</p>	<p>Does not Support</p>	<p>See VPAT 3 for Headsets that meet the FCC Hearing Aid Compatibility Act (HAC) requirements.</p>
<p>(i) Interference to hearing technologies (including hearing aids, cochlear implants, and assistive listening devices) shall be reduced to the lowest possible level that allows a user of hearing technologies to utilize the telecommunications product.</p>	<p>Supports with one product exception</p>	<p>Headsets and base assemblies in general do not possess circuitry capable of generating interference per ANSI/IEEE C63.19 Standard. The 510S headset produces interference with hearing technologies due to physical design and use of T-coils.</p>

<p>(j) Products that transmit or conduct information or communication, shall pass through cross-manufacturer, non-proprietary, industry-standard codes, translation protocols, formats or other information necessary to provide the information or communication in a usable format. Technologies which use encoding, signal compression, format transformation, or similar techniques shall not remove information needed for access or shall restore it upon delivery.</p>	<p>Supports</p>	<p>Headsets do not interfere with communications and do not remove information.</p>
<p>(k)(1) Products which have mechanically operated controls or keys shall comply with the following: Controls and Keys shall be tactilely discernible without activating the controls or keys.</p>	<p>Supports</p>	
<p>(k)(2) Products which have mechanically operated controls or keys shall comply with the following: Controls and Keys shall be operable with one hand and shall not require tight grasping, pinching, twisting of the wrist. The force required to activate controls and keys shall be 5 lbs. (22.2N) maximum.</p>	<p>Supports</p>	
<p>(k)(3) Products which have mechanically operated controls or keys shall comply with the following: If key repeat is supported, the delay before repeat shall be adjustable to at least 2 seconds. Key repeat rate shall be adjustable to 2 seconds per character.</p>	<p>Does not support</p>	<p>Any key repeat feature is less than 2 seconds and the rate cannot be adjusted.</p>
<p>(k)(4) Products which have mechanically operated controls or keys shall comply with the following: The status of all locking or toggle controls or keys shall be visually discernible, and discernible either through touch or sound.</p>	<p>Supports</p>	

VPAT 4 Product: Wireless Headsets (Non-HAC)
Operated with dedicated Base assembly
Over the Ear Voice Tube: CS70, CS70/HL10 Lifter
Over the Ear Noise-Canceling: 510S, 510S/HL10 Lifter

Section 1194.31 Functional Performance Criteria - Detail Voluntary Product Accessibility Template		
Criteria	Supporting Features	Remarks and explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Supports	Support for people who are blind or visually impaired is provided through headset and base controls that are tactilely or audibly discernible.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	Supports	Support for people who are visually impaired is provided through headset and base controls that are tactilely or audibly discernible.
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided	Supports	Support for people who are deaf or hard of hearing is provided through headsets that are Hearing Aid Compatible (HAC) and operable with VCO and HCO TTY's.
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	Does not Support	See VPAT 3 for Wireless Headsets that meet the FCC Hearing Aid Compatibility Act (HAC) requirements.
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	Supports	Headsets are operable with VCO and HCO TTY's

(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	Supports	Headsets and base assembly can be operable with limited reach and strength ability.
---	-----------------	---

Section 1194.41 Information, Documentation and Support		
Criteria	Supporting Features	Remarks and explanations
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge.	Supports	
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supports	A description of the accessibility and compatibility features of products can be obtained upon request via email, fax, web site or telephone.
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	Supports	Support services for people with speech and hearing disabilities are available through TTY, email, fax and Live Chat.
