

VXi BlueParrott® Xpressway II™

The Xpressway II convertible headset strikes the perfect balance of lightweight comfort and heavy-duty noise-canceling.

The three-in-one for the road.

In some jobs, there's just no getting away from the noise. So if you want to, or need to talk on the phone, you've got a problem. Unless you get the VXi BlueParrott® Xpressway II, the latest in BlueParrott's popular line of Bluetooth® headsets. Xpressway II strikes the perfect balance of lightweight (0.6 oz.) comfort and heavy-duty noise-canceling—knocking over 93% of background noise out of your conversations. It also features wideband audio, for clear, accurate communication. Plus A2DP support for great sound from music players, GPS and other Bluetooth-enabled devices. Xpressway II's right-sized ear cushion rests comfortably on your ear, and its choice of three wearing styles lets you choose the style and fit that work for you.

- **Xtreme Noise Suppression™** technology quiets even the most aggressive background noise.
- **A choice of wearing styles**, on-the-ear, over-the-head and behind-the-neck included
- **Wideband audio** lets you understand every word.
- **A2DP** for use with other Bluetooth-enabled audio devices.
- **Multipoint pairing** lets you use two cell phones or a phone and a Bluetooth-enabled PC in tandem.
- **7+ hours of talk time per charge** means you can keep on talking.
- **Lightweight and roadworthy**, so it's both comfortable and durable.

The best sound, style and comfort. Wherever you go.

On the road or on the job, with the Xpressway II, you're good to go.

Clear communications. Advanced VXi noise-canceling, plus wideband audio, means every word gets heard.

Fewer distractions. Stable and comfortable, Xpressway II keeps users focused.

Real value. With three wearing styles, multipoint pairing and A2DP support, the Xpressway II does it all.

Go far, stay private. A range of up to 66 feet gives you twice the wireless freedom compared to most other Bluetooth headsets, while 128-bit data encryption keeps your calls secure.

Xpressway II gives you a choice of foam (two sizes) and rubber ear cushions.

Xpressway II includes three wearing styles, over-the-ear, over-the-head and behind-the-neck.

Why Wideband Audio?

In simple terms, wideband audio means a higher quality of voice transmission. Traditional narrowband telephone transmissions severely limit the range of frequencies, resulting in the pinched, tinny sound that often made voices hard to understand. But wideband audio transmits a much fuller range of frequencies, for a clear, more natural sound. So wideband audio is more intelligible, which means fewer misunderstandings. It also allows users to concentrate on what's being said, instead of straining to decipher unclear words. The ultimate benefits are increased productivity, less fatigue—and more satisfied customers.
