

ELECTRONIC HOOK SWITCH CONTROL FOR CISCO IP PHONES

The Jabra 14201-22 EHS Adapter enables remote Electronic Hook Switch Control (EHS) with Jabra wireless headsets and selected Cisco IP phones.

This means that users can hear ring tones, answer and end calls, adjust the volume or even mute the call up to 450 ft. away from their desks. The integration of handset and headset allows users to benefit from enhanced mobility and the ability to multitask while on a call. The wireless freedom improves work efficiency and ergonomics throughout the day.

HOW IT WORKS

The EHS Adapter is a plug-and-play solution that converts from the DHSG standard used in Cisco phones to the DHSG standard used in Jabra headsets – and vice versa.

HANDSET-HEADSET COMPATIBILITY

The EHS Adapter is compatible with a wide range of Cisco phones.

For more details see the technical specifications on page 2 or visit www.jabra.com/cisco.

THE JABRA LINK 14201-22 EHS ADAPTER CAN BE USED WITH THESE JABRA HEADSETS
