

FAQ

CHAT™ 60

Personal speakerphone for Skype™

■ Q: What is the CHAT 60?

The CHAT 60 is the newest member of the Personal Conferencing family of audio products from ClearOne, the leading provider of high-performance audio conferencing products. The CHAT 60 is a personal speakerphone that provides high quality audio for hands-free calls with Skype, the popular software used by millions of businesses and individuals to make free calls over the Internet. The CHAT 60 connects to laptops and PCs via USB and contains HDConference™ for rich, full-duplex audio communication.

■ Q: What sets the CHAT 60 apart from the competition?

The vast majority of people making calls with Skype use a headset connected to their PC for the audio. The CHAT 60 was specifically created as a high performance hands-free alternative to a headset, freeing Skype users from the need to be tethered to their PC. The CHAT 60 is full-duplex and is completely plug-and-play, requiring no software or drivers to be installed; just plug it into a USB port and your Skype calls are now crystal clear and hands-free.

The CHAT 60 contains HDConference™, the suite of high-performance audio technologies that was developed for ClearOne's market-leading professional conferencing products, including:

- Full-duplex audio — allows you to listen and speak at the same time without the audio cutting out.
- Echo cancellation — eliminates acoustic echo for audio that is much more intelligible.
- Noise reduction — removes ambient room noise for more natural-sounding conversations.
- Automatic gain and level controls — adjust microphone and speaker levels automatically.

■ Q: How do I connect the CHAT 60 to my laptop or PC?

The CHAT 60 easily connects to PCs or laptops via an included USB cable. The CHAT 60 is completely plug-and-play, requiring no software or drivers to be installed. When you plug it into an available USB port, the CHAT 60 will automatically become the default audio device for Windows (speaker and microphone) and your Skype calls are automatically routed to the speakerphone.

■ Q: What is the manufacturer's warranty on the CHAT 60?

The CHAT 60 comes with a 2-year manufacturer's warranty—double the warranty from any competing product.

■ Q: Which users will benefit most from the CHAT 60?

The CHAT 60 is the perfect audio peripheral for anyone making calls with Skype. However, the CHAT 60 is especially useful in the office or home office, and for the teleworker or traveling professional.
