

STAY CONNECTED WHEN WORKING SOLO

Employees working solo, in hard-to-reach areas, can now communicate from and with the crowd as simply as picking up a phone. A phone with 2-way radio intercom and broadcast even in areas without cellular or Wi-Fi coverage, and NO monthly minute or data rates.

The EnGenius DuraFon PRO-OHC4 offers long-range telephone and 2-way radio coverage up to: 3,000 acres in open areas like farms or ranches; or 250,000 sq. ft. in a semi-open area like a warehouse or stadium. The system can provide handset-to-handset 2-way radio communication and the ability to broadcast to groups of handsets. The DuraFon PRO-OHC4 can work behind a PBX (phone system) or as a stand-alone phone system with standard phone lines.
