

## Why use a wireless headset?

**Free your hands.** The most obvious benefit of a headset is that it frees you from holding the telephone handset. And lets you put both hands to work, comfortably.

**Get more done.** A headset makes you more productive, letting you type, page through files, etc. with both hands while you're on the phone.

**Save your neck.** You'll be more comfortable with a headset—no more propping the telephone between your head and shoulder.

**Increase your reach.** A wireless headset gives you all this, plus the ability to get up and go, more than 30 feet away from your desk.

## Why choose the GN 6210?

Will the GN 6210 give you the freedom and flexibility you need? The following features should give you a good idea:

**Wireless headset system.** If you need to be able to leave your desk while you're on the phone, you should really consider a wireless headset.

**Behind-the-ear style.** The GN 6210 has a unique, contoured style that fits inconspicuously behind your ear.

**Sound in one ear (monaural).** Ideal if you like to be aware of what's going on around you during phone calls.

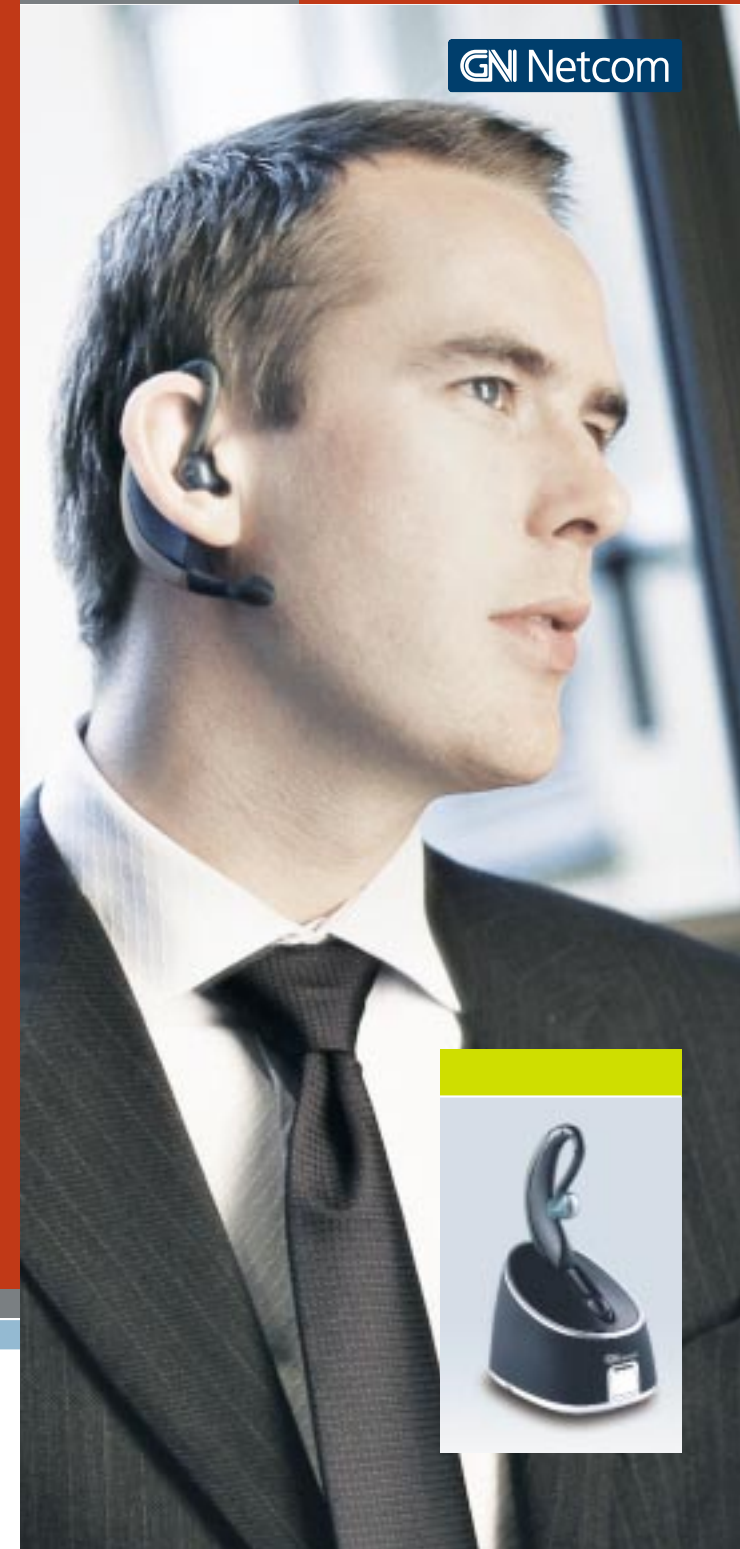

**Noise-filtering microphone.** The right choice if you work in an environment where there's occasional noise.

**Dual use.** You can use the GN 6210 with both your desk phone and your Bluetooth-enabled mobile phone.

## You can take it with you.

If you're on the move, you need a headset that won't get in your way. Or tie you down. A cutting edge tool that will free your hands in the office—and beyond. You need the freedom and flexibility of the GN 6210 wireless headset.

### Wireless is the way to go.

You don't spend the day at your desk. You're up and down. In and out. So as much as you could use the hands-free productivity boost of a headset, a corded model isn't really the answer for you.

The GN 6210 is. It uses the latest in wireless technology—Bluetooth®—to give you the freedom to come and go. With the GN 6210, you can roam as far as 33 feet from your desk without getting off the phone! (The headset's base station/charger makes any phone Bluetooth-capable.) And you can do it

with confidence, because the GN 6210 uses advanced encryption and frequency-hopping to keep your conversations secure.

You'll go in comfort, too. Because the GN 6210 headset is made to go where you go. It's got a unique, discreet, behind-the-ear style that stays completely out of your way. And it weighs next to nothing. So it isn't just easy to wear—it's easy to forget you're wearing it!

### Convenient. Not complicated.

The GN 6210 takes only minutes to set up. And gives you up to 8 hours of talk time per charge. Keep it in the base when you're not using it, and the GN 6210 will always be ready for you. The truth is, the GN 6210 can simplify your life: its GN Link™ technology allows you to seamlessly switch between your office phone and your Bluetooth-ready mobile phone. One headset for both phones—how convenient is that?
