

GN 9330 USB

Wireless IP telephony. Wideband sound.

The new GN 9330 USB wireless headset makes all your PC-based IP telephony conversations sound better. High definition, wideband IP audio ensures you hear – and are heard – with superb clarity.

- Up to 200 feet of wireless office freedom
- WiFi-friendly 1.9 GHz frequency with DECT 6.0 wireless technology
- Revolutionary wideband sound quality for IP telephony
- Up to 6 hours talk time without recharging
- Noise-canceling microphone for reduced background noise
- Digital encryption for secure conversations
- Stylish and lightweight, at less than 1 oz
- Two wearing styles included: headband and earhook
- Exceptional ease of setup and use

Talking has never sounded this good. The GN 9330 USB is the first wireless office headset to offer true wideband audio. Its 6.8 kHz audio bandwidth is more than twice that of conventional telephony. Not only does our high-definition sound give you the feeling of a true “face-to-face” conversation, it also helps increase your productivity because you hear every detail the first time.

Noise-canceling microphone technology ensures your voice is always transmitted clearly, no matter where you are in the office. And conversation security is guaranteed as well. Thanks to digital encryption, rest assured that the person you’re talking to is the only one listening.

Headsets have never been so easy to setup and use. The GN 9330 USB headset connects quickly and effortlessly to your computer. Intuitive headset controls make it easy to operate, and at less than an ounce, you’ll forget you are even wearing it.

With a range of up to 200 feet, you can take calls throughout your office. And with 6 hours of talk time (around-the-clock talk time with optional, hot-swappable interchangeable battery) you can conduct your day’s business without recharging. The GN 9330 allows you to escape the limitations set by your conventional telephone handset, providing hands-free convenience, all-day comfort, and superb sound clarity.

GN 9330 USB

Feature	Benefit
Truly wireless headset	Freedom from your computer: hands-free mobility and increased productivity.
Range up to 200 feet	Get maximum value from your office area. Move hands-free and unhindered throughout the work day. You no longer need to be next to your computer to conduct business calls over the internet.
Talk time on a single charge: up to 6 hours	Conduct all your business without cutting calls short. A second, interchangeable battery is available as an accessory.
Standby-time: 43 hours	Your GN 9330 USB is always standing by ready for action.
Battery recharge time: 3 hours	Your headset is always ready for the next day's business.
Battery charge status	The four LEDs on the base keep you informed of your headset battery status at all times.
Noise-canceling microphone	Your voice is transmitted clearly, even in noisy environments.
Full wideband audio of 200 Hz – 6.8 kHz	The GN 9330 USB's revolutionary wideband audio makes PC-based IP telephony conversation exceptionally clear with enhanced detail and quality.
Mute function	The mute button is easily accessed, stopping your voice from being transmitted when you have to consult with a colleague during a call.
On-line indication	Easily recognized LED illumination informs others of your on-line status.
Volume control	Intuitive controls facilitate easy volume correction.
2 wearing styles: • On-the-ear (earhook) • Over-the-head (headband)	Choose the style that suits your personal preference.
Outstanding connectivity	The USB base enables effortless, quick connection to PC-based IP telephony (softphones); the plug 'n' play setup ensures trouble-free, intuitive, daily operation.
PeakStop™ technology –max 118 dB SPL (RMS)	Protection against sudden, loud sound spikes from the telephone network.
64-bit digital security encryption	The GN 9330 USB digitally encrypts your calls, giving you complete call security and conversation confidentiality.

Technology:	DECT 6.0 operating at 1.9 GHz
