

Guide for connecting a wireless headset to the Konftel 300 ENGLISH

INSTALLATION

A wireless headset software upgrade can be added to provide greater flexibility to your Konftel 300. The microphone on the Konftel 300 and the headset microphone are simultaneously active. The headset helps to improve audio clarity when one person is more active in the conversation. It also enables you to move about and turn away from the Konftel 300, for example, if you need to write on a whiteboard without loss of audio quality.

Refer to the Konftel website, www.konftel.com/300 for compatibility and recommended headset settings.

Upgrade your Konftel 300

PREPARATION

Open Konftel PC Suite from the Start-Menu on your computer. Click "Next" to proceed.

If you not have the Konftel PC Suite installed on your computer, enter www.konftel.com/upgrades to download.

Make sure that you have the Konftel upgrade file for wireless headset is available.

STEP IV The upgrade is completed. Exit the Konftel PC Suite.

Restart your Konftel conference phone by remove and reinsert the power plug. A message will indicate that an upgrade is added to your Konftel 300.

Connecting a wireless headset to your Konftel 300

Connect the AUX outlet underneath the Konftel 300 and the headset phone connection using the telephone cord included in headset.

Adjust the levels according to the headset manual.

To adjust the headset, move away from the Konftel 300 so that your voice can not be picked up from the Konftel 300 microphone. Move into another room if the room is not large enough.

Please note! Always disconnect the power supply from the electrical outlet when disconnecting or connecting equipment to the Konftel 300.

Privacy mode

If privacy is needed during a conversation, turn off the Konftel speakers to only use the headset as the audio output.

Activate the speakers by pressing the OK button, The Konftel 300 is now working normally.
