## Build trust with world-leading secure technology featuring Push-to-Talk and Noise Cancellation

Helping the Department of Defense leverage the power of technology to improve citizen engagement & build trust.

For many government officials, the reality of working in a fast-paced public office is that you can't always find somewhere private to call and wireless headsets are now prohibited by the Department of Defense (DOD). Jabra offers several solutions that will keep your conversations secure.

The Jabra Biz Series offers a range of professional corded headsets with great sound. The Biz Series headsets are made for all day wear with a lightweight and comfortable design that is also highly durable. The noise-cancelling microphone filters out background noise and surrounding conversations, ensuring that only the agents voice is transmitted clearly. For enhanced efficiency and security, our Push-to-Talk functionality allows agents to transmit their voice only when pressing the button on the controller, assuring you meet the new guidelines for selecting "collaboration peripherals."\*
