

# JABRA ZiPHONE DIALPAD

DATASHEET

## THE COMPACT HEADSET TELEPHONE FOR BUSY CONTACT CENTER AGENTS.

The Jabra Ziphone is no ordinary analog telephone. Instead of using a handset, the Jabra Ziphone uses any GN headset (purchased separately) that provides an immediate solution for remote contact center workers or busy ACD (Automatic Call Dialer) contact center environments. The Jabra Ziphone has a compact, space savings design with increased ergonomic and productivity benefits.

Tired of using an ordinary handset? By using any GN corded headset with the Jabra Ziphone, you can now eliminate unnecessary neck and shoulder pain while taking your calls and managing your work more efficiently.

The Jabra Ziphone provides the features of a regular handset telephone, including a range of user friendly and professional capabilities such as hook switch dialing and answering, redial, mute and flash transfer functions.

The unique GN Netcom Quick Disconnect (QD) design makes it easy to disconnect your headset from the Ziphone- practical if you don't want to take your headset off while retrieving files in another room.

The Jabra Ziphone comes in a silver and black cabinet with a visually enhanced numeric dialpad. The Jabra Ziphone is the obvious choice for anyone that spends extended time on the telephone such as a remote call center agent or busy contact center environments.
